Professional Summary

Fullstack developer with a strong desire to help other people make their work more efficient, with a long history working in customer service positions in various industries and a well developed talent for figuring out what people need and how to deliver it to them.

Recent Development Projects

Piggyback Application – a freelance project with a startup company and is being built using .NET Core and RESTful API connections. (I signed an NDA and am limited on what specifics I can discuss.)

MousePark API – a multitier ASP.NET Web API that allows users to create, manage, rate, and view theme park attractions. (<https://github.com/Fkitchell/MousePark>)s

Technical Skills

Languages: C#, VB.Net, VueJS, ASP.NET, API development, HTTP methods, MVC, pair programming
CI/CD: Agile, Scrum, Git
Testing Tools: Rational Clear Quest, Mercury Tools, Unit Testing
Databases: SQL Server, relational databases
Web Technologies: HTML, CSS, APIs, stateless components, session validation, responsive web design, Bootstrap

Work Experience

Application Engineer – Royal United Mortgage–Indianapolis, Indiana Oct 2020 – Present

- Design, build, and maintain custom business applications leveraging both vendor API's and private endpoints used in other applications to automate company processes reducing inefficiency and increasing value.
- Utilize C# and Visual Basic to create custom software plugins in *Encompass*, a mortgage loan software used in >70% of United States mortgages, increasing efficiency along all points of the loan life cycle.
- Regularly refactor existing code bases to improve application functionality, reduce repetitive code, and build on fundamental principals of Object Oriented Programming, APIE and SOLID.
- Create sales reports to give vital feedback regarding loan pipeline to organizational leadership.

Freelance Software Developer – Indianapolis, Indiana July 2020 – Present

- Collaborate on a startup financial service application being built as an API Middleware program in ASP.Net.

IT Help Desk Specialist – Marian University – Indianapolis, Indiana Sep 2015 – Apr 2020

- Patched software and installed new versions to eliminate security problems and protect data.
- Evaluated user problems using test scripts, personal expertise, and probing questions.
- Responded to support requests from end-users and patiently walked individuals through basic troubleshooting.
- Configured hardware, devices, and software for employee workstations.
- Collaborated with vendors to resolve advanced hardware issues.

Education

Eleven Fifty Academy, .NET Software Development Boot Camp May - July 2020

- 12-week immersive learning program for Software Development taught with industry-guided curriculum, real-world project-based learning, and 500+ hours of logged coding time and training

Marian University Indianapolis - Psychology, Philosophy, Pastoral Leadership Aug 2013 – May 2016
